Education

National Institute of Technology, Andhra Pradesh, India (NIT-ANP) [2021-2025]
Bachelor of Technology in Engineering C.G.P.A. – 8/10

Clubs and Activities:

- **I & E Cell** Executive Member (Technical Wing)
- **Graphic Café** Executive Member (Technical Wing)
- **Prayatnam** Coordinator

Inter School: Lions School, Lal Diggi, Mirzapur, Uttar Pradesh C.G.P.A. - **10/10** (Science Stream)
High School: Lions School, Lal Diggi, Mirzapur, Uttar Pradesh Percentage – **94.8 %** (Science Stream)

Experience

IIM Indore [Intern: On-Site] [May 2023 - July 2023]
Projects: (a) S.I.R. ML Model (b) Data Visualization of Movie Budgets

- Delivered a **ML model** that forecasted susceptibility, infection, and the rate of recovery of disease with an **accuracy of 91%**.
- Optimized ML algorithm improving model performance to **R^2 Value = 0.90 out of 1**.
- Analyzed **560+ datasets** using **R & ggplot2** for Data Visualization.
- Built analytical reports visualizing **movie genre vs budget relationships** via graphs and plots.

Counselxperts [Part-Time Web Developer: College Startup] [May 2023 –August 2023]

- Developed website onboarding **100+ new users** during initial deployment.
- Designed cross-platform and responsive payment list cards **reducing transaction time** by **~40%.**
- Delivered React and JavaScript based skeleton framework accelerating development setup.

Sawari [Part-Time Web Developer: College Startup] [December 2022 – February 2023]

- Integrated Google Form based payment workflow with the website **reducing processing time** 5min to 2min **(60% faster)**.
- Designed and deployed marketing website section improving user engagement.
- Structured GitHub repository improving collaboration and version control workflow.

Competitive Conqueror [Operations & Strategy Associate: College Startup] [August 2022 – October 2022]

- Generated **₹10K+ profit** within **2 months** with zero initial investment.
- Analyzed social media trends to attract targeted user demographics.
- Designed company branding including logo, typography, and marketing assets.

Core Metal Kraft Limited- L&T and **Schneider Electric** Partnered Company [Intern: On Site] [July 2022 - August 2022]

- Reviewed **more than 10 designs** and worked with Senior CAD Design Team on corrective improvements.
- Designed LT panel compartment minimizing electromagnetic interference risk between generator and other electric components.
- Assisted testing, calibration, and maintenance of electrical panels and CNC machines.
- Analysed engineering blueprints and documented daily workflow operations.

Projects

CNN- Ensemble Model for Predicting Surface Roughness in Real Time **Link:** CNN-EM-Model
Video Link: Real Time

- Deep learning ensemble model with predictive accuracy of **90%** and **R^2 value** of **0.90 out of 1**.
- Combined **CNN** feature extraction, stacking it with **Ensemble** of **XGBoost / SVM** for prediction improvement.
- Deployed it as a **Pre-Trained Model** into **Real-Time GUI System** for live roughness prediction**.**
- Delivered live roughness prediction using **Computer Vision with < 1 min latency.**

Audio to Meeting Minutes Generator **Link:** NLP-GenAI
Deployed: Meet-Min

- Built **LLM-based** meeting minute's generator using **Transformers & NLP** to automate documentation.
- Automated **speech-to-text transcription using OpenAI Whisper**, generating **results under 5 min.**
- Creates highly structured meeting minutes with defined decisions, tasks, and schedules, **automating ~80% of manual effort**.
- Developed end-to-end **pipeline** with **LangChain**, **Hugging Face** and **Open Source LLM Models**.

ANN- Deep Learning Model for Predicting Tool Failure **Link:** ANN-DL-Model

- Deep learning model with predictive accuracy of **86%** and **R^2 value** of **0.8 out of 1**.
- Involves more than **10,000 dataset** for building this Machine Learning model.
- Utilized **scikit-learn**, **tensorflow**, **pandas** and **numpy** ML packages.

Skills

Programming: Python, R **Machine Learning:** TensorFlow, Scikit-learn, CNN, ANN, Deep Learning, PyTorch
Generative AI: LLM Engineering, Prompt Engineering, Hugging Face, Ollama, Open-Source LLMs, NLP
Data Analysis: Pandas, NumPy, SciPy, Matplotlib, ggplot2 **Computer Vision:** OpenCV **Tools:** Git, GitHub
Deployment / Interfaces: FastAPI, Gradio, Hugging Face Spaces **Web Development:** React.js, Node.js, Express.js, Bootstrap

Awards & Accomplishments

International Science Olympiad (I.S.O) **1st Position** at District Level Round
International Math Olympiad (I.M.O) **2nd Position** at District Level Round
Inter School English Debate Competition **2nd Position**
